

Mr. O'Brien's Homework Rubric

Here's the deal for organizing your unit's homework to be turned in on test day:

Complete & Check: Make sure each assignment is finished and checked (with ✓ or ✕).

Correct: Correct each error by reworking the problem in a different color. If the problem does not require re-working, jot a note explaining your error.

Organize & Staple: Arrange homework in order (oldest homework on top). Make sure each assignment is labeled with name and page number. Staple together with the revision day cover sheet on top.

Each assignment gets 2, 1 or 0 points based on the following rubric:

0	1	2
Not all problems attempted.	All problems attempted, but not all checked or corrected or explained (working or a note).	All problems attempted, checked, and corrected with working or a note explaining your error.

You will get **one additional point** for ensuring that all work is organized and stapled.
